MICROS is the first Hotel CRS Provider to provide a powerful Direct Connection to Hotelzon.com utilizing myfidelio.net

Connection allows hotels to manage rates, availability, inventory and reservations directly from its MICROS Property Management System

Neuss, Germany – February 20th, 2009 – MICROS Systems, Inc. (NASDAQ:MCRS), a leading provider of information technology solutions for the hospitality and retail industries, is pleased to announce the launching of a powerful XML-based direct connection between Hotelzon.com, one of Europe's leading online hotel reservations company, and myfidelio.net, MICROS's distribution services powered by the OPERA Reservation System.

myfidelio.net is the first Central Reservation System on the market connecting directly to Hotelzon. This unique and innovative solution will enable the hotel to manage all rates - public and negotiated - inventory and availability from its MICROS Property Management System and to receive reservations directly into its hotel system, utilizing myfidelio.net.

"myfidelio.net is Micros' state-of-the-art central reservation services offered as a Software as Service solution and it is fully integrated with all Micros's Property Management Systems. With the direct XML connection with Hotelzon.com hotels will manage all contracted rates and inventory from a single point of entry and receive reservations directly into the hotel's front-office system. By eliminating the maintenance of extranets, hotels will save valuable time that can be invested in revenue management and planning activities", said Andrea Carrillo Bianchi, Director Business Development for Distribution Logistics at Micros. "We are the first hotel central reservation services provider to connect directly with Hotelzon and both companies will be offering an excellent value to the hotel industry", she continued.

"Hotelzon is pleased to offer a cost effective and transparent distribution channel for hotels using Micros Property Management Systems. By operating through Hotelzon, hotels have a potential to reach over 15 000 corporate clients and dozens of travel agents globally", stated Lasse Nordlund, the Marketing Director at Hotelzon International. "This service greatly reduces the administration implications for hotels, as the availability, rate and booking information is automatically transferred between the PMS and Hotelzon. With fewer intermediaries between the hotel and Hotelzon, the cost of distribution is significantly reduced", he concluded.

Myfidelio.net is the “Software as a Service” model of the OPERA Reservation System, an enterprise solution for the hospitality industry, providing central reservation management services and connections to worldwide distribution channels, the GDS and the hotel corporate website. Myfidelio.net offers full integration with all hotel solutions offered by MICROS, including OPERA PMS, Fidelio Suite 8 in Europe, Fidelio Version 6, and Fidelio Version 7. For more information on myfidelio.net please visit www.myfidelio.net.

About Hotelzon.com

Hotelzon was founded in 1972. It is one of the oldest hotel booking companies in Europe, as well as a leading global hotel booking technology provider to corporations, hotels and agency partners. The group headquarter is in Helsinki, Finland, and the company is privately owned. Hotelzon has over 100 employees and subsidiaries in UK, Sweden and China. The Hotelzon proprietary booking system offers the availability and price information and booking functionality to over 90.000 hotels worldwide including an exclusive hotel inventory in Finland, Sweden, Norway, China and UK. Hotel bookings through Hotelzon system are constantly increasing and last year there were 1,2 million room nights sold to all continents in the world.

For hotels, Hotelzon offers a cost effective and transparent distribution channel directly to thousands of corporate and travel agency customers. With its support for negotiated rates, Hotelzon system enables hotels to develop close relationships with bookers of more than 15.000 corporate customers globally.
