## **MICROS-Fidelio added 9 chains with over 480 hotels in 2008 to myfidelio.net, for hotel distribution in GDS and Internet channels**

*With myfidelio.net, Micros-Fidelio offers the most flexible and functionally richest Hotel Central Reservation System on a Software as a Service model*

**Neuss, Germany – February 20th, 2009** – MICROS Systems, Inc. (NASDAQ:MCRS), a leading provider of information technology solutions for the hospitality and retail industries, is pleased to announce that a total of 9 hotel chains, covering from the budget to the luxury segment and with hotels located in major destinations in Europe, Africa and Asia Pacific chose in 2008 the distribution services of myfidelio.net to connect to GDS and Internet channels. This high acceptance of chains proves the flexibility of the central reservation and distribution services provided by myfidelio.net, fulfilling the various needs of hotel groups.

The largest chain is Travelodge, with over 300 properties in the United Kingdom, Ireland and Spain. The smallest is the newly created brand Park Royal with 6 luxurious hotels in Singapore, Myanmar and Vietnam, which are part of Global Hotel Alliance.

Other chains that joined the myfidelio.net services are: Reval Hotels in the Baltic area, Sun International in Southern Africa, The Doyle Collection in Ireland and USA, Marco Polo Hotels in Hong Kong, China and Philippines, Thon Hotels in Norway and Belgium, Jurys Inn in the United Kingdom and Ireland.

The recently founded hotel brand SENTIDO Resorts, owned by Thomas Cook, has also decided for the myfidelio.net distribution, including a fully customized booking front-end for its corporate website.

The Doyle Collection and Marco Polo are as Park Royal members of the Global Hotel Alliance, whose distribution services “gha.net” are provided by myfidelio.net since 2006.

Most of the chains – specifically Travelodge, Reval Hotels, Sun International, The Doyle Collection – are connecting their property management systems directly with distribution channels via myfidelio.net, benefitting from a true single image distribution scenario.

Peter Agel, Vice President Distribution Logistics at Micros-Fidelio EAME, added: “Our MICROS-Fidelio hotel clients are increasingly benefitting from enterprise systems

integration and automation. Enabling hotels to control their inventory from a hotel level to all direct and indirect distribution channels and partners is key for their business success. All what their clients want to see and book is always available in real time.”

Myfidelio.net is the “Software as a Service” model of the OPERA Reservation System, an enterprise solution for the hospitality industry, providing central reservation management services and connections to worldwide distribution channels, Internet portals, the GDS and the hotel corporate website. Myfidelio.net offers full integration with all hotel solutions offered by MICROS, including OPERA PMS, Fidelio Suite 8 in Europe, Fidelio Version 6, and Fidelio Version 7. For more information on myfidelio.net please visit [www.myfidelio.net](http://www.myfidelio.net).
